# MICHELIN<sup>®</sup> X-TWEEL<sup>™</sup> SSL

**No Maintenance** – MICHELIN<sup>®</sup> X-TWEEL<sup>™</sup> SSL is one single unit replacing the current tire/wheel/valve assembly. There is no need for complex wheel/tire mounting equipment. Once they are bolted on, there is no air pressure to maintain.

**No Compromise** – Productivity can be increased because the MICHELIN X-TWEEL SSL provides greater stability and enables a skid steer to work faster with more comfort for the operator, reducing driver fatigue while improving productivity. The MICHELIN X-TWEEL SSL delivers a consistent footprint with strong wear life that is two to three times that of the pneumatic tire at equal tread depth. Additionally, the unique energy transfer within the poly-resin spokes reduces the “bounce” associated with pneumatic tires.

**No Downtime** – MICHELIN X-TWEEL SSL performs like a pneumatic tire, but without the risk and costly downtime associated with penetrations and impact damage.
