2011 Education Programs Schedule

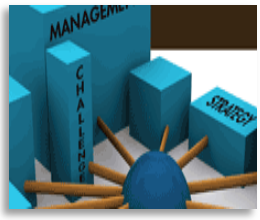

CSCMP
The World's Leading Source for the Supply Chain Profession.™

Fundamentals of Supply Chain Management Workshop

Fundamentals of Supply Chain Management is an introductory, two-day, interactive workshop covering all aspects of the supply chain from how to choose a facility location, to reverse logistics, to staff management. Attendees are split up into groups to state their final case study and are judged on their findings. The best group receives a prize and all attendees receive a "Certificate of Completion". Register at: cscmp.org

Location: CSCMP Headquarters, Lombard, Illinois
Dates: March 21-22 and June 27-28

Strategic Supply Chain Management: Concepts and Applications Workshop

This two-day **intermediate workshop** was designed for leaders facing the challenge of making supply chain relevant to overall business success. It is valuable for both leaders in supply chain management and for those outside supply chain (engineering, finance/accounting, sales, marketing, facilities, and manufacturing). Attendees work in groups to examine case studies and exercises and receive a "Certificate of Completion". Register at: cscmp.org

Location: CSCMP Headquarters, Lombard, Illinois
Dates: April 12-13 and September 13-14

Location: TBD, Atlanta, Georgia
Date: November 7-8

Webinars *In*-Demand

Webinars In-Demand was created with current economic and industry issues in mind. Developed by top industry performers, webinars will engage you and your staff while ensuring quality content and value CSCMP is recognized for. Each topic gives you an opportunity to apply newly-acquired knowledge and value-added benefits to your business operations. Check the webinars schedule at: cscmp.org

RFID Forum 2011

RFID Forum was originally hosted in 2008 gathering the forces of CSCMP, VICS and the University of Arkansas to bring you the latest in RFID Item-Level tagging research and trends. Every year the forum attracts professionals from all over the globe to learn more than just the benefits of RFID, but about the integration and results from top companies and practitioners. Attendees will have the opportunity to tour the University of Arkansas RFID Research Lab and attend a full day of educational sessions. Registration coming soon!

Location: University of Arkansas, Fayetteville, Arkansas
Dates: October 25-26
