

Since 1923, the Institute has pioneered the areas of transportation education and training. The Institute has the unique status of being the only such school of its kind. The curriculum of the Institute spans all possible areas of involvement within the transportation, logistics management, and supply-chain fields.

Through the expertise of its outstanding faculty, the Institute provides comprehensive, up-to-date knowledge to professionals who want to successfully compete in today's complex logistics and supply chin industry. We do this at the students' pace, not ours.

The Institute prides itself on its practical approach and skills training curriculum. No other school, college or university can duplicate its long tradition of teaching and employing the concept of "practical skills" training. Some 2,500 companies have hired many of the 84,000+ alumni of the Institute to manage their companies' logistics departments.

The Institute and its graduates have held a unique position in the field of education. The Institute has provided service for over 78 years to an industry that accounts for over one trillion dollars of the annual gross domestic product of the United States.
