BIOSCIENCES

# DESIGNED FOR DECISIONS

At Castle Biosciences, we deliver gene expression profile testing across dermatologic disease states to support clinical decision making. Our tests provide actionable molecular insights that inform diagnosis, risk stratification, treatment planning, and patient management, helping clinicians make more confident decisions to improve patient care.

Stop by booth #3345 to grab coffee and learn more about GEP testing.

## Decision Dx ► Melanoma

Designed to provide a personalized risk assessment to inform decisions and improve outcomes for patients with cutaneous melanoma

## Decision Dx ► SCC

Designed to identify metastatic risk and the likelihood to benefit from ART in patients with high-risk SCC

## MyPath ► Melanoma

Designed to aid in the diagnosis and management of patients with ambiguous melanocytic lesions

# DESIGNED FOR DECISIONS

At Castle Biosciences, we deliver gene expression profile testing across dermatologic disease states to support clinical decision making. Our tests provide actionable molecular insights that inform diagnosis, risk stratification, treatment planning, and patient management, helping clinicians make more confident decisions to improve patient care.

Stop by booth #3345 to grab coffee and learn more about GEP testing.

## Decision Dx ► Melanoma
