

## Recent Releases

Project	Description	Released
Heavy Haul Rates	With Heavy Haul Rates, carriers get route-based estimates that factor in permits, escorts, and state-by-state requirements before booking a load. No more piecing together quotes across tools or guessing on costs. The result? Faster decisions, better margins, and fewer surprises once the truck is on the road.	Q2 2026
Trucker Path Partnership	Trucker Path and Truckstop.com are partnered together to bring Truckstop loads directly into the Truckloads app, giving carriers access to more freight in one place. Brokers gain broader visibility across an active carrier network.	Q2 2026
Verified Carrier Integration	Stronger carrier verification starts here. Truckstop has partnered with Verified Carrier to bring real-time carrier verification and risk insights natively into the platform. Automate compliance, flag bad actors, and stop double-brokering before it starts. All without leaving Truckstop.	Q2 2026
Load Boost	Enable Brokers to pay \$1 to boost loads in search results for 30 mins	Q2 2026
Truckstop Fuel Card Wallet	The free Wallet feature connects your Truckstop Factoring account to a digital business account, so funds are available anytime — even nights, weekends, and holidays. Transfer instantly to your bank, pay drivers, or use popular payment apps.	Q1 2026
Carrier Business Tools	All carriers now have access to invoicing and document management — store PODs, generate	Q1 2026

	professional invoices, and keep critical paperwork in one place to get paid faster.	
Intrastate Load Board	Intrastate limited view of the Load Board enabling temporary access to pending Carrier users, or those only authorized within their domicile state	Q1 2026
Mobile – SmartMatch <i>BETA</i>	UX/UI to deliver highly relevant, AI-driven load recommendations to Carriers both in product and via email  <i>(Note: BETA available to a subset of customers)</i>	Q1 2026
Mobile – KeepRate <i>BETA</i>	UX/UI to equip Carriers with real-time profitability insight at the load level based on fixed costs inputs  <i>(Note: BETA available to a subset of customers)</i>	Q1 2026
Mobile – Backhaul IQ <i>BETA</i>	UX/UI to provide visibility into backhaul loads for Carriers  <i>(Note: BETA available to a subset of customers)</i>	Q1 2026
Heavy Haul Load Board: Quoters on Mobile	Rate and Permit quoter functionality for the Heavy Haul Carrier Pro Package in the TS Go Mobile App	Q1 2026
ELD Truck/Fleet APIs	APIs enabling RMIS customers to lookup the current location of a specific vehicle (truck) or all vehicles in their fleet.	Q1 2026
My Network <i>BETA</i>	Carrier monitoring solution allowing Brokers to view FMCSA, CPR, and COI data for a list of Carriers as well as leverage that list with the Private Loads feature in the Load Board  <i>(Note: BETA available to a subset of customers)</i>	Q1 2026
Truckstop MCP Server	The Truckstop MCP Server lets developers quickly connect apps and AI tools to Truckstop data with reliable APIs and real-time load and capacity insights.	Q1 2026

Truckstop Load Board for Heavy Haul	Specialized load board built specifically for oversize freight, combining <a href="#">heavy haul loads</a> with rate and permit quotes in one place. That means you can understand permits, escorts, and trip costs upfront so you can price confidently and avoid surprises.	Q1 2026
Truckstop Load Board for Dry Van	Now it's faster than ever to zero in on loads that <a href="#">match your equipment</a> . For real-time intelligence on rates by lane, Pro comes with an exclusive integration of SONAR Insights.	2025
Enhanced Broker Factoring	Powered by Denim, Truckstop Factoring helps brokers streamline billing, simplify AR/AP, and get paid faster.	2025
Private Loads	With Private Loads, brokers can post loads to their RMIS-certified carrier network or seamlessly tap into the load board to find verified carriers. Carriers can view private and spot loads all in one place. The result? Speed, efficiency, and peace of mind for both parties.	2025
Market Conditions Map	See load density and truck capacity across the country. Carriers, gauge demand in any region and position your truck for more opportunity. Brokers, understand market conditions in an area to inform rate negotiations.	2025
Authority Age Filter	New authority? Save time and reduce the frustration of calling on loads you don't qualify for.  Use the <b>Authority Age Filter</b> to see only loads you're qualified to haul, based on a broker's authority age requirement.	2025
Deep Links	Brokers, link your load posting to your own load board to speed up the booking process for preferred	2025

	carriers. Carriers, book loads instantly right from a posted load.	
Pin Load	Save important loads to your pinned list for easy reference and quick booking when you're ready to move.	2025
Broker Factorability	Use Broker Factorability to instantly see if a load is factorable right in the load summary, saving you time and increasing your chances of getting the loads you want.	2025
Load Popularity	Load Popularity Prioritizes loads that have less competition, so you have the negotiating power you need to get the loads you want.	2025
Similar Loads Recommendations	<p>Automatically expand your search to get more matches.</p> <p>Similar Loads Recommendations solves the challenge of not seeing enough loads in your search by expanding your criteria to uncover more loads and opportunities.</p>	2025
Backhaul Search	Backhaul Search swaps your origin & destination on your search tab to help you quickly find backhauls and avoid driving empty.	2025
Onboarded Status	Using Onboarded Status to filter, you can quickly spot loads posted by brokers you're already onboarded and approved to work with.	2025

## Upcoming Releases
